

**Nawid Roufi**

Hello, my name is Nawid Roufi, and I have been a Geography Teacher for the past eight years. Throughout my career, I have had the opportunity to work in both the UK and the UAE, which has allowed me to develop a deep passion for educating students about critical issues such as climate change, development, and sustainability. Currently, I am pursuing a Master's in Climate Change and Development at SOAS University, further enhancing my subject knowledge in areas that are significant in today's world. Outside of teaching, I am deeply interested in the Fourth Industrial Revolution, with a particular focus on cryptocurrency and blockchain technology. I believe that by combining my teaching experience with my academic knowledge, I can build a strong foundation to empower students to make meaningful contributions to our ever-changing world. My aim is to inspire and equip the next generation with the knowledge and skills necessary to address global challenges effectively.
