

## **Ana Maria Grigore - SENCO**

I now have seven years' teaching experience and during this time, I attained the National Award for SEN Coordination Post Graduate Certificate and completed my Master of Education Special Educational Needs and Disability (Med SEND). I have also gained certification in Psychometric Testing and Assessment which enables me to promote a strong culture of inclusivity to students with learning difficulties. My certification in Psychometric Testing also allows me to offer practical and reliable estimates of attainment and ability skills for a very wide range of students.

As a SENCo and as a parent myself, I have always instilled an inclusive practice attitude where no student is less important than anyone else. I believe in what is fundamentally right for all our children: their right to mainstream inclusive education based on respect and equality at its core.
